

God lives in your heart

Morya Wisdom 3

Geert Crevits

# Foreword

## to the original Dutch edition

God lives in your heart and you can find Him/Her there. This is an age-old truth. Sometimes forgotten, unlearned, neglected, forbidden, burned, illegal, repressed, needing permission, paying the price, returning, starting again, now the shepherd, then again the sheep. New heights, an abundance of light, great tenderness, together with the Masters, grace...

This third ‘Course in the Deepening of Life’, as it was called, was recorded on some four cassettes during the course of three afternoons on July 13 and August 3 & 24, 1994. Geert spoke these 44,000 words deriving from a pure, enduring contact with Master Morya, in the presence of a small group of people.

## 1 - A little life and a great life

*You cannot separate heaven and Earth; they are one whole. In fact, they are intertwined. The human being belongs to both Earth and heaven. Why is it that sometimes he feels so sad? On this Earth people live with secrets. The greatest secret in our lives is love.*

Each true force to be found within the human being comes from above. There is much within us that doesn't come from there, but the true forces within people come from above. Without these forces a person could not live. The things within a person that come from this Earth is one thing, but there is something else. There is another force that comes to the Earth by way of heaven and then, from this Earth, again returns to heaven. In everything that exists there is a movement and there is a link, a concordance between heaven and Earth, and it is about this concordance that I would like to talk to you now.

Heaven – in other words the higher realms – accommodates an infinite number of beings, each working in their own way. Heaven isn't made up of a system of worlds that can exist on their own. No, the one world needs the other. The Earth needs heaven but heaven also needs the Earth. It is one whole and whatever happens here on Earth happens in heaven as well and whatever takes place in heaven will once take place here on Earth. There is a connection, the one deepens the other and there is an essential accord that keeps becoming deeper and keeps changing. At the moment in time in which we are now living, heaven wants to approach the Earth in a new way. There is a change taking place in the spheres, a rearranging. The beings are gradually becoming aware of this change, and this change will also exteriorize itself here on Earth.

As a seeker, you, along with all the other people who are searching, are now trying to see your life as it is and in this way you are setting your life on another course. Because the one who is able to see life as it is will discover that he begins to do other things with his life.

You should look at life as being an energy that comes from above, making its way down to Earth to then again return above. I say *above* to differentiate it in some way, but actually it is not really *above*. Actually the worlds are all together, each on another vibration, and you should

realize that time and space do not really exist. But on this Earth, in this universe, time and space do exist. It's something difficult to explain; I only mention this in order to situate it a bit. Not to make it difficult for you but to give you the insight that there exists something like another life; a life that encompasses other dimensions and other experiences, which have nothing to do with time and space. Here on Earth, however, we are immersed in time and space and are even unable to break loose from them because our physical bodies and our minds are bound to this time and this space. But in reality our souls can escape.

When we listen to the deepest within ourselves, we are then outside of time and outside of space. Even heaven is inside of us and we should try to become conscious of this. Living on this Earth our consciousness can grow and grow and grow, to such an extent that we become aware of our own great inner life. Therefore, there is a little life that everyone lives, without exception, and there is a great life that some people are able to live and others not.

This great life, which is within each one of you, and that therefore you can live, is structured in such a way that, there, you can have a contact with heaven. Each of you, in a manner of speaking, could have a contact with heaven within yourself. There is no need to try to reach

through the clouds to somewhere amongst the stars in order to find heaven, because that is not where you will find it. You should be able to go within yourself, and there is where you will find heaven. However, when you go within yourself it is generally more usual not to find heaven; what you find, instead, is the little life, the life connected to this Earth, that comes from this Earth, that thinks about this Earth and lives with this Earth. This is a different energy from the energy that comes to people from out of the cosmos, from heaven, from the Divinity.

To put it simply – these two energies are what make a being ‘human’. The human being doesn’t only belong to this Earth, nor does he or she only belong to heaven, the human being belongs to both. This is then the difficulty in his life, the fact that if he wants to deepen his life he needs to see himself as belonging not only to this Earth but as belonging to heaven as well. Many people only want to be in heaven and are unwilling to accept the Earth. But not wanting to see where it is they are standing and what it is they are facing, and sometimes not even wanting to live it, will not solve the problem.

Many children are born who don’t want to come to this Earth and this is because they come from heaven, from a deepness, a bliss, a joy, and they don’t want to experience the Earth because they cannot see the sense of it. Very many people find it difficult to be on Earth and they have

a vague sense that there is something else that exists. However, when it comes to it, they are afraid of leaving this Earth, and yet they shouldn't be frightened.

The Earth is a place in which to live, in which to learn to love, in which to have all kinds of experiences that are very important and that can only be lived here on Earth. The Earth is something like a distorted heaven, a heaven turned around because it has been thrown into time and space. When you can see the Earth in this way – as a heaven that has been thrown into time and space – you'll see that there is an unending dispersion on this Earth. The unity is gone, the unity has gone missing, and this unity is just what humankind is striving for – striving for the unity of man and woman, the unity of family, the unity of a people and anything else you can name that a person longs to bring to unity, to harmony. But he is unable to find it and this makes him sad, unhappy and distressed. He doesn't know how he can achieve this unity because of the fact that everything he sees and everything he takes to hand is a piece of reality that doesn't seem to fit with another piece of reality, or at least this is what he thinks.

The reality is different. This turned-around world is, in itself, a unity, but this is something people are unable to see. Heaven speaks to us by way of this Earth. If you could listen to yourself, to your inner self, you would hear
